Leg 04 with glides for community use

Multi-purpose table, that comes with four legs, ideal for public spaces in general. It is equipped with an elegant aluminum die-cast joint and a chrome or polyester powder coated metal structure. For an increased flexibility, a linking device is available to align and connect the tables very easily. Practical breaking castors can be applied to allow for easy and fast movement within any room. The table is stackable up to 10 pieces. By installing two of the four legs on the outside of the top you can stack leg04 frontally up to 9 pieces (with or without castors).
