

UPGRADE

design Alberto Basaglia Natalia Rota Nodari

“Innovation” is the key concept behind the new line of furnishing accessories by Diemmebi S.p.A., the company internationally famous for its production of furniture for communities.

Upgrade is the first and most exemplary product of the philosophy of DIEMMEBI HOME: a small armchair of perfect form which harmonizes with any ambience, indoors or out of doors. When turned upside down, as if by magic, Upgrade becomes a three-step ladder with state-of-the-art proportions. A comfortable seat and a safe ladder at the same time, it has conveniently sized steps to bring everything, everywhere, within easy reach.

Upgrade is made of 100% recyclable plastic, by the rotational moulding technology; it supports up to 130 kg and doesn't need mechanisms or extra parts to transform itself from seat to step-ladder. Upgrade is entirely Made in Italy, as required by the Diemmebi philosophy.
