

Ribaltone

Design Alberto Basaglia Natalia Rota Nodari

Design patent. Ribaltone features a contemporary design and extreme versatility.

Two aluminium die-cast three-way joints and seven bent steel tubes are all it takes to obtain in just a few minutes an elegant table that can be easily fit wherever you need it. When not in use, its table top can be removed from its metal frame to allow quick and easy storage. Ribaltone is available with epoxy-coated frame and HPL round top.

A few items delivered in a lightweight and compact package which can be easily transported to minimise CO2 emissions: Ribaltone is perfectly in line with DIEMMEBI environmental commitment.

Ideal for the contract sector in general.
