

# Ribaltino Tilt

Design Alberto Basaglia Natalia Rota Nodari

Design patent. Ribaltino is a flip-top table featuring compact dimensions. It is lightweight and handy since it is stackable up to a countless number of pieces.

An aluminium die-cast three-way joint and four bent steel tubes are all it takes to obtain in just a few minutes an elegant table that can be easily fit wherever you need it.

Available also in a fixed version and in two different heights, Ribaltino comes with a chrome or epoxy-coated metal frame. The HPL top is available both in a round and square shape.

A few items delivered in a lightweight and compact package which can be easily transported to minimise CO2 emissions: Ribaltino is perfectly in line with DIEMMEBI environmental commitment.

Ideal for the contract sector (bars, wine bars, restaurants, waiting rooms, coffee shops, etc), Ribaltino will win you over with its contemporary design and versatility: it can be stored easily when not in use.
