

Aikido Plastic 4 legs with arms

Aikido uses components from its predecessor laKendò, with an added signature feature of a extra-high polypropylene backrest, shaped appropriately to ensure excellent stacking in all situations. The backrest has an opening at the top, designed to enhance the proportions and overall look, whilst also doubling as a convenient handle to pick up and move the chairs. A multi-purpose chair that can be easily laid out in a variety of configurations and moved around in community spaces. The writing tablet version and addition of elegant castors showcase its versatility and timeless adaptability to perfection.

Awards:

2024 - Gold Award at Best of NeoCon di Chicago (category Seating: Stacking)
