

.015 FLAT BENCH Design Alberto Basaglia Natalia Rota Nodari

Respect for the environment in which it is installed and a highly practical and comfortable design are just some of the benefits of the 015 flat bench. It is constructed from 13 tubes which are bent to rest it on the ground, adding an air of extreme lightness and apparent simplicity to this bench. Highly linear, yet sophisticated.

Bent pipe structure, diameter 18mm, made of stainless steel or polyester powder coated steel tube and hot-dip galvanized steel. Ready-equipped for fastening to the ground with bolts or joined together using steel plates.
