

SUZO FIX Design Diemmebi R&D

Family of tables with powder-coated metal frame available with height-adjustable or fixed leg. With up & down electrical mechanism, the table on castors can be easily nested thanks to its folding top or be used as a more classical height-adjustable desk. Suzo can be equipped with a metal PC holder, which is available in all the versions of the range. If necessary, the space-saving solution of the folding top can turn into a practical video projection screen.
