

.h24 MIAMI Design Alberto Basaglia Natalia Rota Nodari

MIAMI is a sun shade with a sturdy, linear metal structure and a minimal design, supporting a large rectangular shade. The shade can be attached to all the tables in the Ventiquattrore.24 collection using the special brackets. The highly technological fabric is inflammable and can block 98% of harmful UV rays. The uprights are fixed on the short side of the table for a space-saving design. MIAMI is available in the classic Urbantime colours: white and micaceous anthracite.
